

MARIENER EXPANDS ITS PRODUCT LINE-UP WITH AN AFFORDABLE, FULL OPTION SKI/SNOWBOARD GOGGLE CALLED THE MARIENER MOUNTAIN

MIDDELBURG – December 22, 2012

This has been an exciting year for Dutch Eyewear brand Mariener (www.mariener.nl). The launch of the Melange series sunglasses started a wave that now takes form in the expansion into snow sports with the launch of the Mariener Mountain Snowboard and Ski Goggles.

Available in White/Rainbow and Black/Rainbow

The Mountain series is the company's first line of [snowboard and ski goggles](#). These goggles are built with the idea of wanting it all, but for an affordable price. The Mariener Mountain is a full option spherical ski / snowboard goggle with many options that industry's leading companies offer for a premium price.

This is Mariener's interpretation of what a goggle should be like.

The first two versions of the Mariener Mountain Goggles will carry a 30% VLT lens called the Rainbow lens. A beautiful multi colored reflective lens for all-round weather conditions.

The large spherical lens offers an unrestrictive view with dual lens technology, coupled with strategic ventilation to make fogging a thing of the past. The Mountain goggle has a 12mm thick high-density face foam with special articulation around the nose area for optimum breathing and comfort at all times.

Every Mariener Mountain goggle also comes equipped with its own hard case for storage and included is a micro fiber pouch for lens cleaning and safe keeping.

About Mariener

Mariener (www.mariener.nl) is an up-and-coming Sunglasses and Accessory brand started in the spring of 2012 in The Netherlands. Mariener provides a brand that is accessible for anyone looking for a stylish pair of sunglasses at an affordable price but with the quality in lenses and frames that you expect from more expensive brands. The product line-up currently consists of the Mariener Melange Sunglasses and our all new Mariener Mountain Ski/Snowboard goggles.
